Secure Communications

Right Track, in association with Snapshield, provides an innovative, cost effective platform that enables total managed voice security solutions over "any and every carrying network" wired, cellular and IP.

▶ Keep private information secret

▶ Secure your communication anytime, anywhere

▶ Patented point-to-multipoint technology

▶ Use your existing phone

▶ No need to change your communication habits

About Us

Snapshield is a leading provider of secure managed communication solutions that are tailored to government, military, first-response and enterprise markets. Snapshield's solutions can be deployed across traditional circuit-switched, mobile and newer IP-based networks and can support the widest variety of commercially available communication equipment, both fixed and mobile.

Snapshield has the ability to manage secure communications at the organizational level as well as at end-user level. Its solutions can be used to enforce secure communications protocols and procedures, update and manage encryption devices, and identify, log, and control all inbound and outbound communication traffic. Snapshield's solutions are completely transparent to the end-user, supporting commercial off-the-shelf (COTS) telecommunications equipment and mobile devices.

Snapshield products are offered either as hardware add-on's or as software upgrades to existing telecommunication equipment, thus giving the company unparalleled flexibility in offering the broadest range of secure communications solutions. Snapshield's products support quad-band GSM,standard Smartphones and commonly used phone, fax and PBX equipment. Snapshield also provides a comprehensive solution to mobile data, both at rest and in motion.

Snapshield's solutions benefit from the company's patented point-to-multipoint technology, enabling secure multiparty conference calls and protection against information theft even when only a portion of the network is secured. Snapshield was founded by veterans of the Israeli Defence Force in 1996, and its solutions are trusted by government agencies, emergency services and enterprises worldwide.

Right Track Ltd. and Secure Telephony

Right Track Ltd. offers innovative products, hi-tech services and is the exclusive representative of Snapshield products in Cyprus and Greece. We have the experience and expertise to implement secure communication solutions into any organization regardless of its size. Collaborating with Snapshield we have further developed our system to meet the needs of individuals as well. We provide complete security so as to ensure your telephone conversation is kept secure and secret.
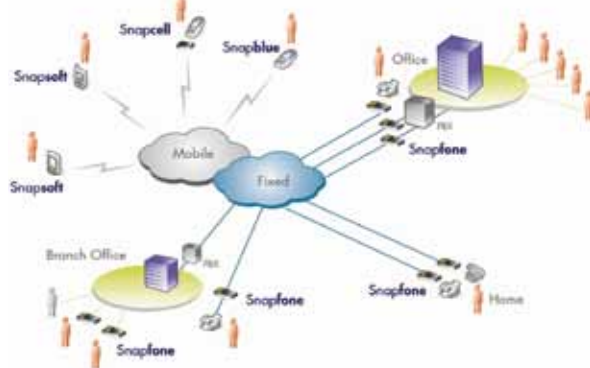

Our Solutions

Snapzone

Snapzone is a flexible secure communication solution for small to medium sized enterprises. Snapzone offers the highest level of security in a manner which is accessible to even the smallest organization. Snapzone allows end-to-end security between parties equipped with an encryption device, irrespective of the type of communication network or the communication device.

Solution Components:

- Snapfone
- Snapblue
- Snapcell
- Snapsoft

Snapcorp

An enterprise level safe telecom solution, providing voice and fax security between all parts of an organization. Snapcorp provides a managed, robust and scalable platform to ensure secure voice and fax communication between all parts of an organization, irrespective of the type of communication network or the communication device.

Solution Components:

- Snapfone
- Snapcell
- Snapblue
- Snaptrunk
- SnapIP
- Snapsoft

Snapshield

Snapshield is a communications platform, allowing for robust, nationwide, secure voice and fax communications across multiple branches of the rescue services. Snapshield works across traditional circuit switched, mobile networks and newer IP based networks and supports the widest variety of commercial available communication equipment both fixed and mobile. Snapshield offers advanced management capabilities, together with a host of unique features.

Solution Components:

- Snapblue
- Snapsoft
- Snapfone
- Snapgate
- Snapconsole
- Snapcell
- SnapIP
- Snaptrunk
- Snapmaster

► Secured web based application

► Top up from any where in the world

► Check your balance on line anytime

Our Products

SnapIP

► SIP protocol signaling

► Deploys IPSec protocol over SIP

► Works in front of Snaptrunk IP

► Overlays existing SIP infrastructure

◄ SnapIP

Snapfone

► Customer POTS interface encryption/decryption unit for voice and fax communication

► Works in conjunction with network-based Snapgate, Snaptrunk or group of other Snapfones

► Management through RS-232 interface

◄ Snapfone

Snapscell

► End-to-end secure voice communication over GSM networks

► Seamless operation

► External management tool (optional)

◄ Snapcell

Snapblue

► Customer encryption/decryption unit for any Dial Up Network (DUN) Bluetooth phones

► Supports both Voice and SMS

► Best cost, usability and portability

► Supports all GSM and CDMA networks

► Support Fixed and Satellite network using optional accessories

► The telephone or subscriber is not identifiable in the network (IMEI is commercial and not unique)

► Enabled for future GPRS/UMTS IP Client

◄ Snapblue

Snapsoft for Snaphone

► Customer encryption/decryption application for pocket PC based Smartphones (supports all mobile 5 and mobile 6 OS)

► Support Voice, SMS, Chat and file transfer capabilities

► Best cost, usability and portability

► Supports all GSM frequencies (850/900/1800/1900 MHz)

► Telephone or subscriber non-identifiable in the network (commercial IMEI not unique), the only product to support both transparent and non transparent GSM data protocols

► Future VPN, firewall, data at rest, intrusion detection and application shutdown capabilities

► Future GPRS/UMTS IP Client

◄ Snapsoft

▲ Snapgate

▲ Snapmaster

Our Products

Snapgate

▶ Telco-Grade, network-based secure communication gateway

▶ Calls are routed through Snapgate to and from service suppliers' networks

▶ Encrypts and decrypts all voice and fax communications

▶ Open system based on CTI and telecommunication standards

▶ Scales up from 30 to thousands of encrypting ports

Snapmaster

▶ Telco-Grade, site management server that controls and monitors all Snapgate operations

▶ Data bases, performance, traffic control, event-logging, record-auditing, encryption keys, billing information, troubleshooting, user-profiles, remote testing and upgrading of Snapfone units and support for SNMP management protocol

Snaptrunk

▶ Customer E1/T1 ISDN and VoIP - encryption/decryption

▶ Unit for voice, fax and IP communication.

▶ Converge fixed, mobile, IP, satellite and LMR networks in to one security managed service

▶ Secure conference capabilities

▶ Full management capabilities

▶ Point to multipoint security gateway

▶ SIP protocol signaling
